

CAPABILITY STATEMENT

Driven to Connect

Telecom and IT field crews. Based in Las Vegas, Nevada, working nationwide.

COMPANY OVERVIEW

DriveNET USA puts experienced field crews on outside plant and inside IT work. We splice copper and fiber in the air, in manholes, and in buried plant, bore and place conduit with our own drill, and handle cabling, cameras, networks, and data center builds inside the building. One crew can take a job from the street to the rack.

CORE COMPETENCIES

Outside plant

- Copper splicing and repair
- Fiber splicing, ribbon and single fiber
- Aerial splicing and pole line work
- Manhole and vault splicing
- Directional boring and conduit
- Buried cable and pedestals

Inside and IT

- Structured cabling, CAT6 and fiber
- Security camera installs
- Switches, routers, and Wi-Fi
- LAN and WAN, VLANs, DHCP, DNS
- Rack and cabinet installs
- Server racking and imaging

WHAT SETS US APART

- Almost 60 years of field experience between our two lead techs
- Our own Ditch Witch directional drill
- Outside plant and inside IT handled by one crew
- Crews that travel from Las Vegas to jobs nationwide
- Owner-operated: the owners work the jobs
- Connected in the trade, so we can staff up fast when a project grows
